PRESENTATION OF DISCONTINUED 1970 COMMODITIES IN 1971 EXPORT QUARTERLY REPORTS

Effective January 1, 1971 thirty-four new export commodity classes were implemented. The class code for seventy-five additional former classes were changed and in these cases there was no change in commodity description or coverage. Fifteen former classes were discontinued eight of which have no 1971 comparison. The remaining seven discontinued classes were retained because the content of these former classes is now included in 2 or more existing classes; the renumbering of these classes will not improve commodity comparison.

Table I shows the 1971 class under which the renumbered (change in code only) 1970 class is presented in the 1971 quarterly export report together with the former 1970 class code.

Table II lists the 1971 classes under which the 8 discontinued classes are presented together with the former class code.

Table III lists the discontinued classes which retain the same class code; for these commodity classes no totals appear in the 1971 column.

Table IV lists the new 1971 classes for which there are no direct 1970 commodity comparison.

EXPLANATORY NOTES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any period include all goods declared on export entries received at DBS during the calendar period. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the month following the month of actual export.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
 - b. **Exclusions:** The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Act; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports, generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Numbers refer to complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Export Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

UNITS OF QUANTITY

BBL	Volume in barrels.
CARAT	Weight in carats.
CORD	Volume in cords.
CWT	Weight in units of 100 lb.
CWT N	Weight of contents in units of 100 lb. (containers excluded).
DOZ	Number of dozens.
DZ PR	Number of pairs in dozens.
FT	Length in linear feet.
GAL	Volume in Canadian gallons.
LB	Weight in pounds.
LB N	Weight of contents in pounds (containers excluded).
M	Number in thousands.
M B F	Volume in thousand board feet.
M C F	Volume in thousand cubic feet.
M KWH	Thousand kilowatt hours.
NO	Number.
PAIR	Number of pairs.
P GAL	Volume of alcoholic content in Canadian gallons of the strength of proof.
RF SQ	Area in roof squares.
SF 3/8	Volume in square feet of 3/8 inch in thickness.
SQ FT	Area in square feet.
TON	Weight in short tons of 2,000 lb.
TR OZ	Weight in troy ounces.

EXPLANATORY NOTES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any period include all goods declared on export entries received at DBS during the calendar period. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the month following the month of actual export.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
 - b. **Exclusions:** The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Act; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Numbers refer to complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Export Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.
